

## PROGRAM 1

```
#include<stdio.h>
```

```
int acc();
```

```
int withdrawal();
```

```
int deposit(int n);
```

```
int main()
```

```
{
```

```
    int tot;
```

```
    acc();
```

```
    printf("Enter amount\n");
```

```
    scanf("%d",&tot);
```

```
    tot= withdrawal(tot);
```

```
    deposite(tot);
```

```
    return(0);
```

```
}
```

```
acc()
```

```
{
```

```
    char name[10];
```

```
    int num,tot;
```

```
    printf("Enter name\n");
```

```
    scanf("%s",name);
```

```
    printf("Enter account number\n");
```

```
    scanf("%d",&num);
```

```
}
```

```
int withdrawal(int n)
```

```
{
```

```
    int amt,new_tot;
```

```
    printf("Enter amount to be withdrewed\n");
```

```
    scanf("%d",&amt);
```

```
new_tot = n - amt;

                return 1;

        }
    }
    return 0;
}

```

```

C:\Users\Admin\Desktop\prg3.exe

Array[0][0]= 1
Array[0][1]= 2
Array[0][2]= 3

Array[1][0]= 4
Array[1][1]= 5
Array[1][2]= 6

Array[2][0]= 8
Array[2][1]= 9
Array[2][2]= 7
Enter The number you want:>7
Number exists

Process returned 0 (0x0)   execution time : 12.183 s
Press any key to continue.

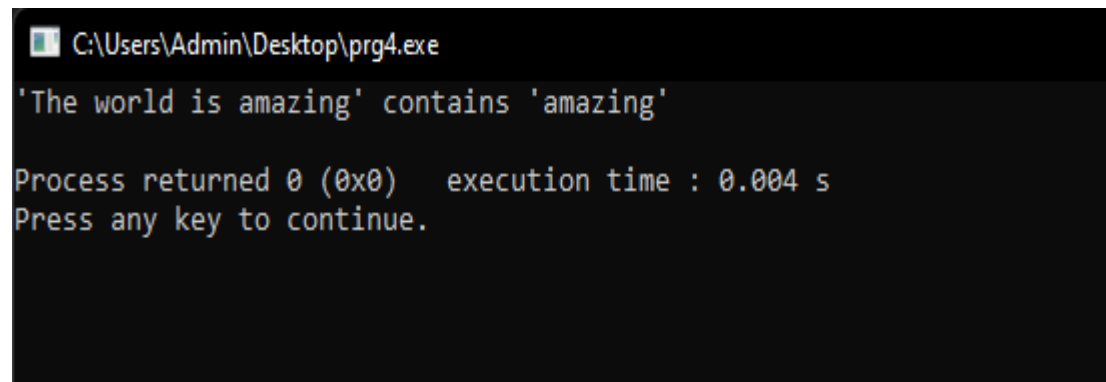

```

#### PROGRAM 4

```
#include <stdio.h>

#include <string.h>

int main()
{
    char str[] = "The world is amazing";
    char search[] = "amazing";
    char *ptr = strstr(str, search);
    if (ptr != NULL)
    {
        printf("'The world is amazing' contains 'amazing'\n", str, search);
    }
    else
    {
        printf("'The world is amazing' doesn't contain 'amazing'\n", str, search);
    }
    return 0;
}
```

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Admin\Desktop\prg4.exe". The command prompt displays the output of the program: "'The world is amazing' contains 'amazing'". Below this, it shows "Process returned 0 (0x0) execution time : 0.004 s" and "Press any key to continue.".

```
C:\Users\Admin\Desktop\prg4.exe
'The world is amazing' contains 'amazing'

Process returned 0 (0x0)   execution time : 0.004 s
Press any key to continue.
```

## PROGRAM 5

```
#include <stdio.h>
// Function to find the index of the last occurrence of a number in an array
int lastIndex(int arr[], int size, int target) {
    int lastIndex = -1;

    for (int i = size - 1; i >= 0; i--) {
        if (arr[i] == target) {
            lastIndex = i;
            break;
        }
    }

    return lastIndex;
}

int main() {
    int size, target;

    printf("Enter the size of the array: ");
    scanf("%d", &size);

    int arr[size];

    printf("Enter the elements of the array:\n");
    for (int i = 0; i < size; i++) {
        printf("Element %d: ", i + 1);
        scanf("%d", &arr[i]);
    }

    printf("Enter the number to find the last occurrence: ");
    scanf("%d", &target);

    int result = lastIndex(arr, size, target);

    if (result != -1) {
        printf("The last occurrence of %d is at index %d.\n", target, result);
    } else {
        printf("%d not found in the array.\n", target);
    }

    return 0;
}
```

C:\Users\Admin\Desktop\prg5.exe

Enter the size of the array: 5

Enter the elements of the array:

Element 1: 1

Element 2: 2

Element 3: 3

Element 4: 4

Element 5: 5

Enter the number to find the last occurrence: 2

The last occurrence of 2 is at index 1.

Process returned 0 (0x0) execution time : 8.844 s

Press any key to continue.

## PROGRAM 6

```
#include <stdio.h>
```

```
int linearSearch(int arr[], int size, int element) { for (int i=0; i< size; i++) {
```

```
    if (arr[i]== element) {
```

```
        return i;
```

```
    }
```

```
}
```

```
return -1;
```

```
}
```

```
int main() {
```

```
    int array[] = {12, 34, 56, 78, 90, 43, 67};
```

```
    int size = sizeof(array) / sizeof(array[0]);
```

```
    int searchElement;
```

```
    printf("Enter the element to search: ");
```

```
    scanf("%d", &searchElement);
```

```
    int result = linearSearch(array, size, searchElement);
```

```
    if (result != -1) {
```

```
        printf("Element %d found at index %d.\n", searchElement, result);
```

```
    } else {
```

```
        printf("Element %d not found in the array.\n", searchElement);
```

```
    }
```

```
    return 0;
```

```
}
```

C:\Users\Admin\Desktop\prg6.exe

Enter the element to search: 90

Element 90 found at index 4.

Process returned 0 (0x0) execution time : 3.696 s

Press any key to continue.

■
